

The CJ container solves the storage and transport of materials that are not stable on their own. It can be perfectly coupled to any type of pallet: wood, metal, plastic or dollies. It allows us to reduce transportation and packaging costs, at the same time that it reduces storage space, due to its easy assembly and disassembly. Its great resistance allows us to guarantee a load capacity of 1000 krgs. per unit, being stackable with this load up to 4 heights..

## BREAKDOWN OF PARTS

- 2 side panels with ring for fastening them.
- 1 rear panel attached to the sides by means of two metal fasteners.
- 1 front panel, 50% folding and removable, attached to the sides by means of four metal fasteners

## MEASUREMENTS

Altura útil	750	1000	1200	1500	2000
Base 800 x 1200	CJ-21	CJ-22	CJ-23	CJ-24	CJ-25
Base 1000 x 1200	CJ-41	CJ-42	CJ-43	CJ-44	CJ-45
Base 1200 x 1200	CJ-51	CJ-52	CJ-53	CJ-54	CJ-55

\*1 Mesures en mm.

\*2 La hauteur extérieure peut varier en fonction du diamètre de la roue.

\*3 Les dimensions peuvent varier en fonction des accessoires.
